

MEDIWRAP® DISPOSABLE AMBULANCE PACKS

The Mediwrap® Disposable Ambulance Pack is used by the Emergency Services, Military Medics and Emergency Planners in place of traditional bedding. With a new bedding set used for each trolley, the pack helps to cut the risk of cross infection for patients and staff. When patient transfer includes leaving the bedding with the patient or in situations where laundry is not available (such as field hospitals), the single use Ambulance Pack provides a high quality alternative.

The Disposable Ambulance Pack contains a Mediwrap Blanket, Absorbent Barrier Sheet, Absorbent Pillow Case and Yellow Clinical Waste Bag for easy disposal.

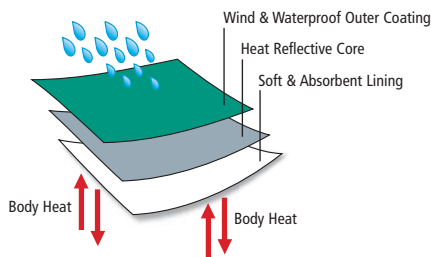

- Creates clean ambulance or working environment.
- Promotes quick turnaround time, with minimal cleaning required.
- High absorbency of bodily fluids.
- Fluids are not transferred to stretcher, trolley, mattress or pillow.
- Individually wrapped packs.
- Minimal storage space required, unlike traditional bedding.
- Now available in military olive drab colour.

Widely used by the Military in place of traditional bedding, as well as by many Ambulance Services and Emergency Planners, the Disposable Ambulance Pack is a proven product in demanding situations.

It is ideal for use on stretcher trolleys, emergency wards, field hospitals, first aid rooms and anywhere clean emergency bedding is required.
