

# MEDIWRAP® HIGH PROTECTION THERMAL BABYWRAP®

The Babywrap single use thermal wrap is ideal for small babies and infants needing to be kept warm during transfers. It is thermally retentive and helps prevent convective, evaporative, conductive and radiative heat loss. The Babywrap has a built in hood to enable the head and body to be completely covered yet leave the face clear and is designed for easy swaddling. The wrap has no fasteners or straps for ease of use and is used entirely on it's own without needing additional blankets or covers.

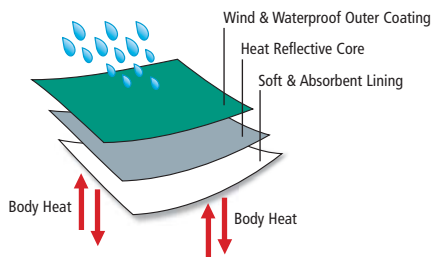

- Comfortable and absorbent.
- Waterproof.
- Single-use.
- Barrier to bacteria.
- Helps maintain body heat.
- Will not disintegrate or lint when wet.
- Latex free.
- Non-conductive, safe for diathermy and defibrillation.
- Radiolucent (x-ray compatible).

The Babywrap is considered essential equipment by many Emergency Services, Paediatric Retrieval Teams and Midwives delivering babies at home.

The Babywrap has been designed in co-operation with NHS Ambulance Service to give complete protection whilst allowing speedy and easy access to any part of the baby.
