

# MEDIWRAP®

## HIGH PROTECTION IN AN EMERGENCY

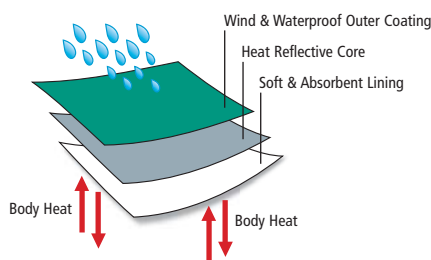

The innovative and versatile Mediwrap textile is ideal for the protection of casualties and victims of any age and will help to prevent the onset of trauma induced hypothermia at any emergency call out. It is widely used by both first responders and the Fire, Police and Ambulance services in victim retrieval and stabilisation prior to hospital treatment. Mediwrap is particularly lightweight and easy to store making it a perfect addition to the standard kit in vehicles where there is limited space such as patrol cars, helicopters and fire service vehicles.

- Single Use.
- Baby, child and adult sizes available.
- Helps minimise risk of cross infection.
- Absorbent inner material.
- Wind and waterproof outer material.
- Thermally retentive.
- Compact, lightweight and easy to store.
- Non linting.
- User friendly.

Mediwrap products are highly thermally retentive and help prevent convective, conductive, evaporative, and radiative heat loss. Mediwrap is used in all Search and Rescue scenarios, victim retrievals and at major incidents or other emergency call outs.

### Mediwrap Innovative Textile

#### MEDIWRAP BLANKET

- Thermally Retentive.
- Compact and Lightweight.
- Easy to carry, store and deploy.

Product Code: MW1002
