

# MEDIWRAP® REST CENTRE SOLUTIONS

Mediwrap® single use products are ideal for use in any emergency situation and provide the complete package for a comfortable overnight stay in a rest centre. At a time when public perception of cross contamination has never been greater, the importance of clean, comfortable, disposable bedding, along with overnight toiletry kits, mattresses and other equipment is key.

With our dedicated team experienced in providing 'Rest Centre Solutions', we offer a tailored and quality service.

The versatile Mediwrap range of high quality bedding is individually wrapped, compact and lightweight making it easy to store and deploy.

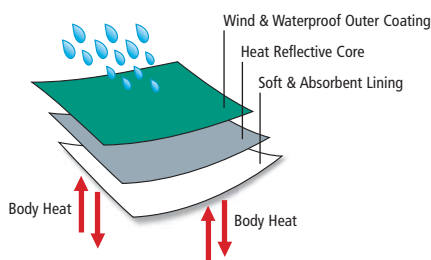

Our popular **Toiletry Pack** contains all the essentials for an overnight stay including toothbrush and toothpaste, comb, bodywash, facecloth, shaving set and more. **The Emergency Sleeping Bag** constructed entirely from Mediwrap textile offers a neat alternative bedding solution. Thermally retentive, there is no need for any additional bedding while ensuring the mattress underneath remains completely clean and dry.

- Unlimited shelf life on all textile products.
- Easy to deploy in a busy rest centre environment.
- Minimal clean up required.
- Eliminates logistics such as laundry.

**"Mediwrap is a top quality product, the service is superb and the team are incredibly helpful. The product range is ideal in emergency situations"**

Keith Nevitt Dip. EP, Senior Services Manager  
Staffordshire, Warwickshire & West Midlands British Red Cross
